## PRESIDENT'S MESSAGE

*We would like to thank our Coaches of the Fundamentals group who were able to ready the players for their new adventure. As of January 1<sup>st</sup>, we were able to form them into another Junior team!*

*Our Intermediate teams are starting to even out, and their games are close and exciting. We might still require a tweak or two.*

*In our Senior division we are finding it difficult to balance the teams, with poor attendance being most of the problem. We hope to come up with a move or two to help and not stir up the teams too much. So if your team is short players reach out to your teammates and get them out here!*

*We are also working on curbing some of our aggressive players and with the help of our officials and conveners will continue to do so.*

*Keep your stick on the Ice!!*

## Helpful Hockey Tips

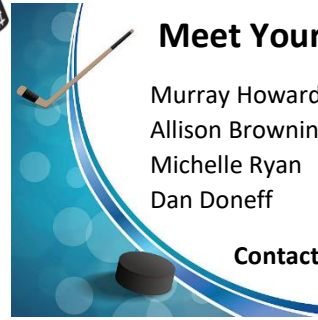

The Goal: the goal area is 6ft wide between the posts, 4ft high from the ice surface to the bar, and 44 inches deep at the ice surface level. A goal is scored when the puck fully crosses the goal line. It must be hit into the net by a stick held below shoulder level, or be deflected into the net off a player, their equipment, or skate – but cannot be deliberately kicked in with a skate or handed in with a glove.
